

# PROTECT NORTH DAKOTA'S TREES

MOVING FIREWOOD CAN TRANSPORT FOREST INSECTS AND DISEASES.

## BUY IT WHERE YOU BURN IT.

If you're a camper heading out for a trip — or just getting firewood for your stove — do nature a favor. Don't potentially transport invasive species.

- ▶ Buy locally harvested firewood.
- ▶ Gather on site where permitted.
- ▶ Already moved firewood? Use it immediately.

The forest will thank you.

NDSU

EXTENSION

Forest insects and diseases kill thousands of trees every day. Keep your backyard, campgrounds and favorite places safe from these insects and diseases.

Prevention is the key. Buy firewood near where you will burn it. Don't move firewood when you travel, camp or visit another state.
