

Goldspotted oak borer mask

For best results:

Print mask on cardstock or other thick paper. Paint with a fun pattern of light brown and gold on the face, all gold antennae, dark brown eyes, and black mouthparts. Sprinkle all parts liberally with gold glitter while paint is still wet. Let dry, cut out eye and string holes. Add string and wear proudly!

Easiest method:

Print mask on cardstock or other thick paper. Color with markers or crayons, then cut out eye and string holes. Add string and wear proudly!

The **goldspotted oak borer** is an invasive tree pest that infests and kills oak trees in Southern California. You can help prevent the spread of this and other pests in California by buying local firewood or certified heat-treated firewood, and properly disposing of brush and yard waste.

Don't Move Firewood has made several bug masks for you to use with your forest pest and pathogen outreach. To find these masks and lots more, visit **Don't Move Firewood** at dontmovefirewood.org, or email info@dontmovefirewood.org
