

Goldspotted oak borer mask

DONTMOVE
FIREWOOD.org

For best results:

Print mask on cardstock or other thick paper. Apply a thin coat of white school glue or glue stick. Sprinkle all parts liberally with gold glitter while paint is still wet. Let dry, cut out eye and string holes. Add string and wear proudly!

Easiest method:

Print mask on cardstock or other thick paper. Cut out eye and string holes. Add string and wear proudly!

The **goldspotted oak borer** is an invasive tree pest that infests and kills oak trees in Southern California. You can help prevent the spread of this pest, and many other pests, by buying local firewood or certified heat treated firewood, and properly disposing of brush.

Visit **GSOB.org** to learn more about this pest.

Don't Move Firewood has made several bug masks for you to use with your forest pest and pathogen outreach. To find these masks and lots more, visit **Don't Move Firewood** at dontmovefirewood.org, or email info@dontmovefirewood.org
