

Trees and forests need your help. You can prevent the accidental spread of tree-killing insects and diseases – like the goldspotted oak borer – by simply buying local firewood near where you'll burn it.

BUY IT WHERE YOU BURN IT.

How to Help:

- ▶ Leave firewood at home — instead, buy local firewood at your destination.
- ▶ Buy only what you will need, and use it all up by the end of your stay.
- ▶ Use your firewood on site. Do not take it home with you.
