

FIREWOOD ALERT!

Tree-killing pests can hitchhike on firewood, spreading insects and diseases that destroy our trees and forests.

BUY IT WHERE YOU BURN IT.

Protect Tennessee by following our firewood regulations:

- ▶ Firewood entering Tennessee is required to be certified heat treated.
- ▶ Heat treatment information can be found at TN.gov.
- ▶ Local firewood vendors can be found at firewoodscout.org.
- ▶ If you have already moved firewood use it immediately. Do not take it home with you, and do not leave excess firewood on site.
