

FIREWOOD ALERT!

BUY IT WHERE YOU BURN IT.

Destructive insects can hitch a ride!

- ▶ Tree-killing insects and diseases can spread by traveling on firewood. The forests of Great Smoky Mountains National Park could be devastated by these pests.
- ▶ ONLY certified, heat-treated firewood may be brought into the park. Heat-treated wood is available at camp stores, or use FirewoodScout.org to find nearby vendors. You can also collect dead and down wood on-site.
- ▶ If you already brought untreated firewood into the park, let our campground park staff know right away.
