

FIREWOOD ALERT!

YOU have the power to protect Texas forests and trees!

BUY IT WHERE YOU BURN IT.

Invasive pests like the emerald ash borer, pecan weevil, and soapberry borer can hitchhike in your firewood. Help Texas prevent invasive pests from destroying trees.

- ▶ Don't bring firewood into Texas from out of state.
- ▶ Buy certified heat-treated or local firewood, or gather it on site when allowed.
- ▶ Use firewood from your property on your property — don't take it with you when you travel out of state or around Texas.
