

# PROTECT TREES, FORESTS & WILDLIFE HABITAT

The transportation of invasive insects & diseases on firewood is destroying trees in prime hunting, fishing & recreation areas.

Visit [dontmovefirewood.org](http://dontmovefirewood.org)

**E**xotic insects and diseases are a major threat to trees, forests, and wildlife habitat. Tree-killing species like emerald ash borer and Asian longhorned beetle can't move far on their own, but they can jump hundreds of miles when people move firewood.

**T**o protect Colorado's natural resources,

- Do not bring firewood into Colorado
- Burn locally cut firewood
- Encourage fellow outdoorsmen not to move firewood

*If you have already brought firewood from out of state, please burn it completely. Do not leave it. Do not take it home with you.*
