Cut and Sell Firewood Locally
firewood.ca.gov

YOU CAN MAKE A DIFFERENCE **BY CUTTING AND SELLING YOUR FIREWOOD LOCALLY**

Live and dead trees can have damaging pest infestations. As a firewood cutter, you can help protect trees - and your business - by minimizing the distance that firewood gets moved.

- Invasive insects and diseases threaten the health of California's forests.
- Moving firewood long distances can spread insects and diseases.

How you can help:

- Sell your wood in the same county or region where it was cut.
- Tell customers to buy their wood from local suppliers whenever they travel.
- Promote the benefits of buying local wood.

Promote the health of California's forests by encouraging people to buy and burn local firewood.
