

EXOTIC INSECTS AND DISEASES ARE A MAJOR THREAT TO TREES, FORESTS, AND WILDLIFE HABITAT.

Tree-killing invasive species like emerald ash borer and Asian longhorned beetle can't move far on their own, but they can jump hundreds of miles when people move firewood.

HOW YOU CAN HELP:

To protect our natural resources:

- Do not bring firewood with you when you travel
- Burn locally cut firewood
- Encourage family and friends not to move firewood

BUY IT WHERE YOU BURN IT.
