

# PROTECT TREES, FORESTS & WILDLIFE HABITAT

The transportation of invasive insects & diseases on firewood is destroying trees in prime hunting, fishing & recreation areas.

**DON'T MOVE  
FIREWOOD**.org

## Exotic insects and diseases are a major threat to trees, forests, and wildlife habitat.

Tree-killing species like emerald ash borer and Asian longhorned beetle can't move far on their own, but they can jump hundreds of miles when people move firewood.

### To protect Montana's natural resources,

- Do not bring firewood into Montana
- Burn locally cut firewood
- Encourage fellow outdoorsmen not to move firewood

If you have already brought firewood from out of state, please burn it completely. Do **not** leave it. Do **not** take it home with you.
